

Turbonomic 6.1.7.1 Release Notes

August 20, 2018

This document describes issues that are addressed in Turbonomic 6.1.7.1 – Release Date: August 20, 2018. All builds are cumulative. Applying 6.1.7.1 onto any release of Turbonomic v5.9 or later will include all previous fixes.

NOTE: These release notes augment the release notes for Turbonomic version 6.1.7. Find the 6.1.7 release notes on the Turbonomic site at:

Fixed Issues

- **Fixed:** In vCenter environments that use VMware vCenter Storage Policy Based Management, for some configurations Turbonomic discovery fails to connect, and the environment returns HTTP status code 400: Bad Request.

Known Issues

- In some vCenter Server environments that include unusual configurations for vCenter, discovery of VMware vSphere Storage Policy Based Management can time out and fail to complete. If you encounter this situation, please contact Technical Support.
