## Note:

This release fixes the following issues, and these release notes only document those fixes. For more general release information, see the release notes for Turbonomic version 6.1.11. The 6.1.11 release notes include sections for What's New, Configuration Issues, and Known Issues that also pertain to this release.

## Fixed Issues

- **Fixed:** After updating to version 6.1.11, the user interface displays an incorrect logo for the button that navigates to the Home Page
